A. Nikhil Kumar

+91 98864 86071 | compsciinikhil@gmail.com | linkedin.com/in/compsciinikhil | github.com/CompsciiNikhil

Professional Summary

Skilled in software development across AI, backend systems, and full-stack web applications, with a focus on building reliable, production-ready solutions. Proficient in Python, Java and SQL, with a strong foundation in system design and API development.

Education

BNM Institute of Technology — **2023 – Present**
B.E. Computer Science Engineering, CGPA: 9.53 (till 6th Sem) — *Bengaluru, India*

St. Joseph's Pre-University College — **2021 – 2023**
Karnataka State Board, 85.67% — *Bengaluru, India*

St. Joseph's Indian High School — **2021**
Karnataka State Board, 93.92% — *Bengaluru, India*

Experience

DRDO – Centre for Artificial Intelligence and Robotics (CAIR) — **July 2026 – Present**
Research Intern — *Bengaluru, India*
- Contributing to a GIS and computer vision research project, working on geospatial data processing and vision-based analysis.
- Collaborating with senior researchers on applied CV techniques within a defense research environment, following structured documentation and review processes.

Salesforce Compass Program — **May 2026 – Present**
Participant & Project Contributor — *Bengaluru, India*
- Contributing to a live enterprise CRM project as measured by on-track completion of program milestones, by analyzing business requirements and translating them into Salesforce platform solutions.
- Collaborating within Agile ceremonies (sprint planning, stand-ups, retrospectives) as measured by consistent sprint delivery, by coordinating structured stakeholder communication across a corporate SDLC framework.

Projects

DfM Intelligence Agent | *Python, FastAPI, PyQt5, Streamlit, OpenCascade*
- Exposed a REST API layer over a CAD geometry engine as measured by successful client-server integration across desktop and web clients, by architecting FastAPI endpoints serving mesh data and analysis results to a Streamlit-based web dashboard.
- Ensured functional and regression coverage across multiple analysis modules as measured by consistent pass results across geometry edge cases, by authoring a structured test suite validating axis optimization, parting line extraction, and Boolean split scenarios independently.

Consumer Credit Risk Verification API | *Python, FastAPI, PostgreSQL, SQLAlchemy, PyTest, Postman*
- Shipped a rule-based credit risk scoring API as measured by 33/33 passing automated tests across business logic and API layers, by implementing a modular, design-pattern-driven risk engine and gating releases through an automated CI/CD test pipeline.
- Validated API reliability as measured by consistent endpoint behavior across test cycles, by authoring Postman-based functional and regression test collections covering business logic and API-layer scenarios.

Smart Recruitment & Interview Screening | *Next.js, FastAPI, ConvexDB, Gemini, LiveKit, MediaPipe, Monaco*
- Ensured reliable handling of untrusted user-submitted code as measured by consistent sandboxed execution outcomes, by designing REST API endpoints across a microservices architecture with request validation and Piston-backed timeout/runtime-error handling.
- Maintained consistent session state across live interview flows as measured by stable proctoring and editor sync, by coordinating frontend-backend state for MediaPipe-based proctoring and Monaco Editor integration.

Skills

Languages: Python, Java, SQL
Web & Backend: REST APIs, FastAPI, Node.js, React, Next.js, WebSocket
Testing & DevOps: PyTest, Postman, Git/GitHub, Docker, AWS
Soft Skills: Leadership, Teamwork, Time Management

Certifications

Red Hat System Administration I (RH124) | Postman API Fundamentals (Student Expert) | Introduction to MongoDB, MongoDB University | Azure IoT Fundamentals | Software Engineering & Agile Software Development, Infosys Springboard

Leadership and Achievements

- Secretary and Treasurer, SIGGRAPH BNMIT
- Super 60
- Samsung Innovation Campus, AI Program (2025)
- Core Committee Member, Tatva BNMIT
